Introduction EthenaFun

EthenaFun is a decentralized Head or Tail betting game and some similar kind of games on the Ethena network using USDe stablecoin as the primary token. It features provably fair mechanics, real-time stats, leaderboards, and bonus rewards, providing a unique and engaging gaming experience.

03

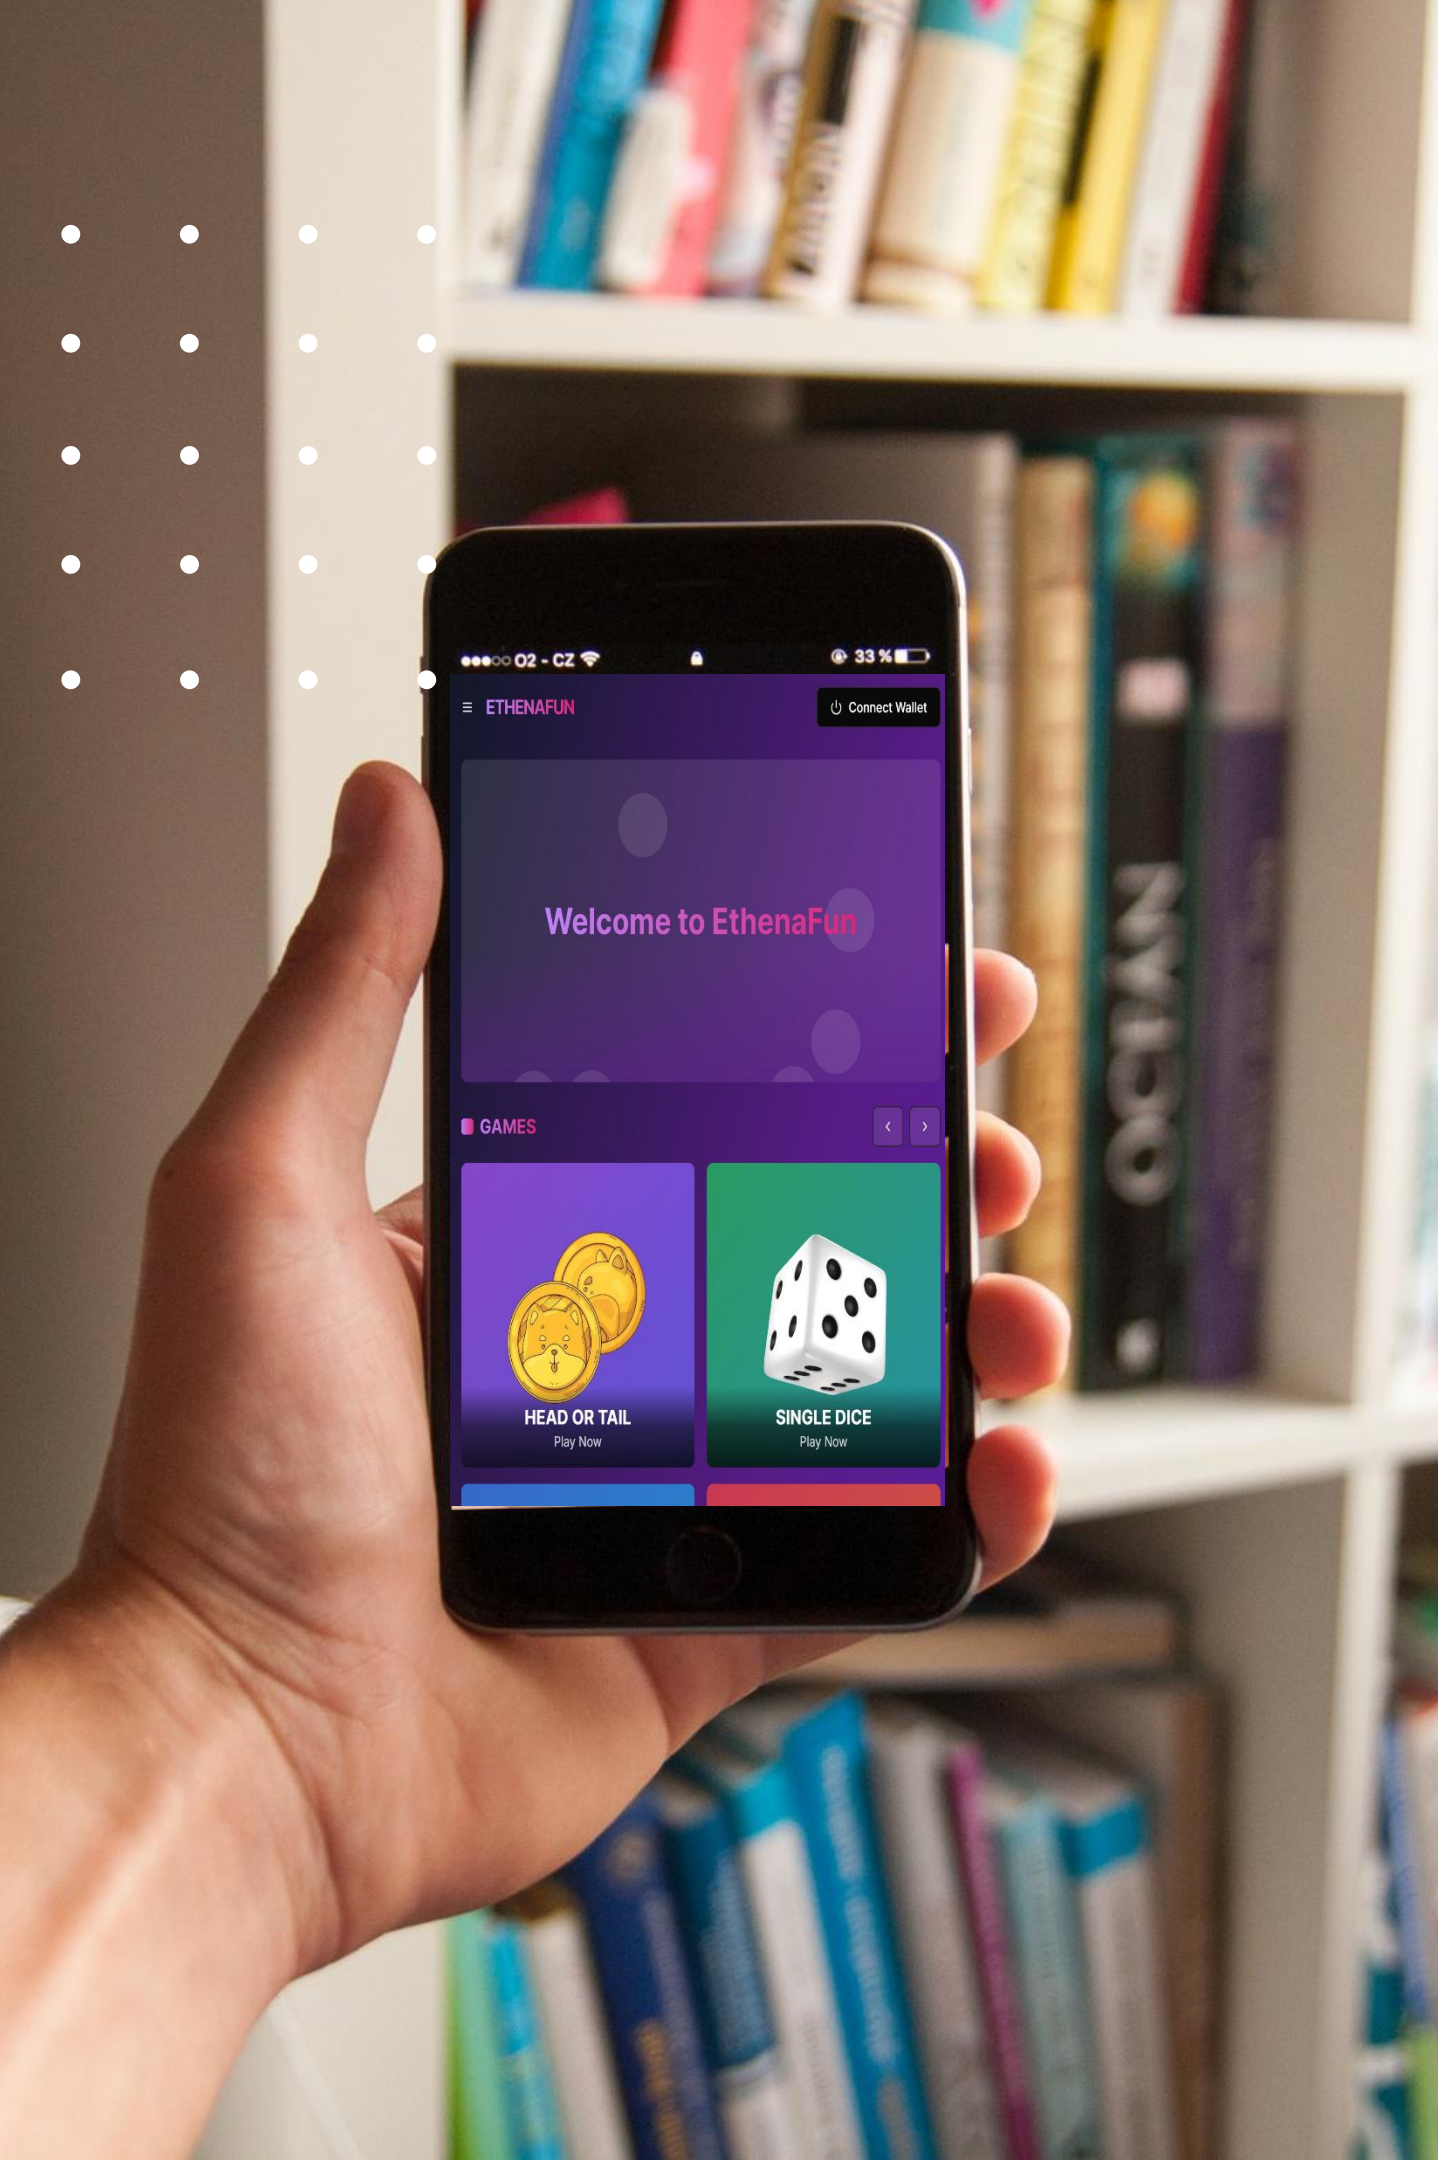

Problem

Problem

Lack of transparent and fair gaming options.

Solution

EthenaFun offers a decentralized, provably fair betting experience with secure blockchain technology.

06

Key features

EthenaFun offers a decentralized, provably fair betting experience with secure blockchain technology and engaging social features.

01

Feature 1

Automated token
management

02

Feature 2

Real-time statistics
and leaderboards

03

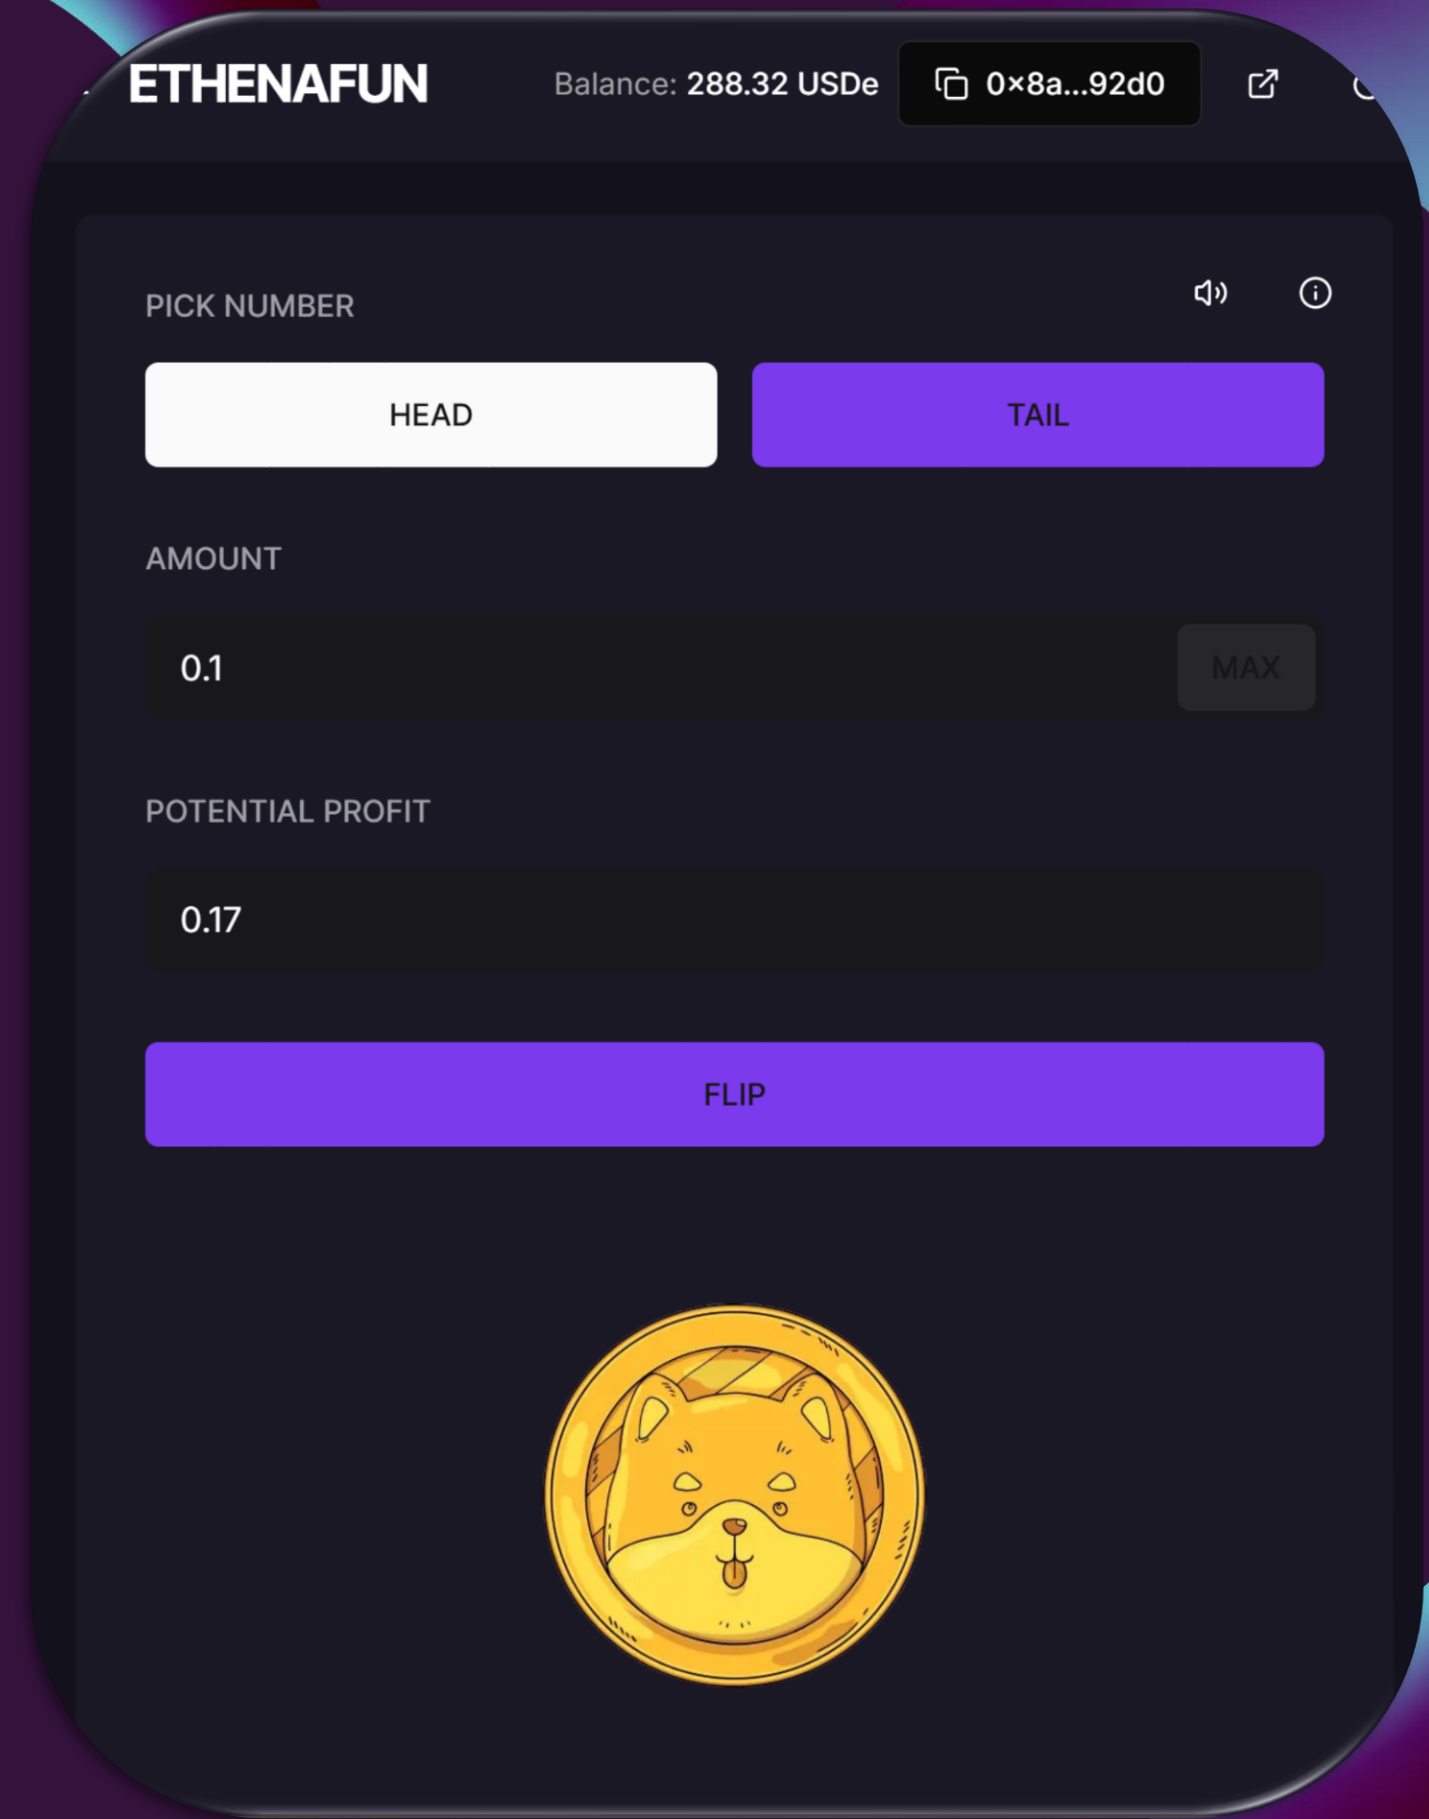

Feature 3

Bonus multipliers and
rewards

How it works

Connect Wallet >
Select Bet Amount >
Play Head or Tail >
Monitor Game Stats >
Collect Winnings

Future Roadmap

09

NFT gaming experience

Enhanced community
engagement

Collaborations with
other platforms

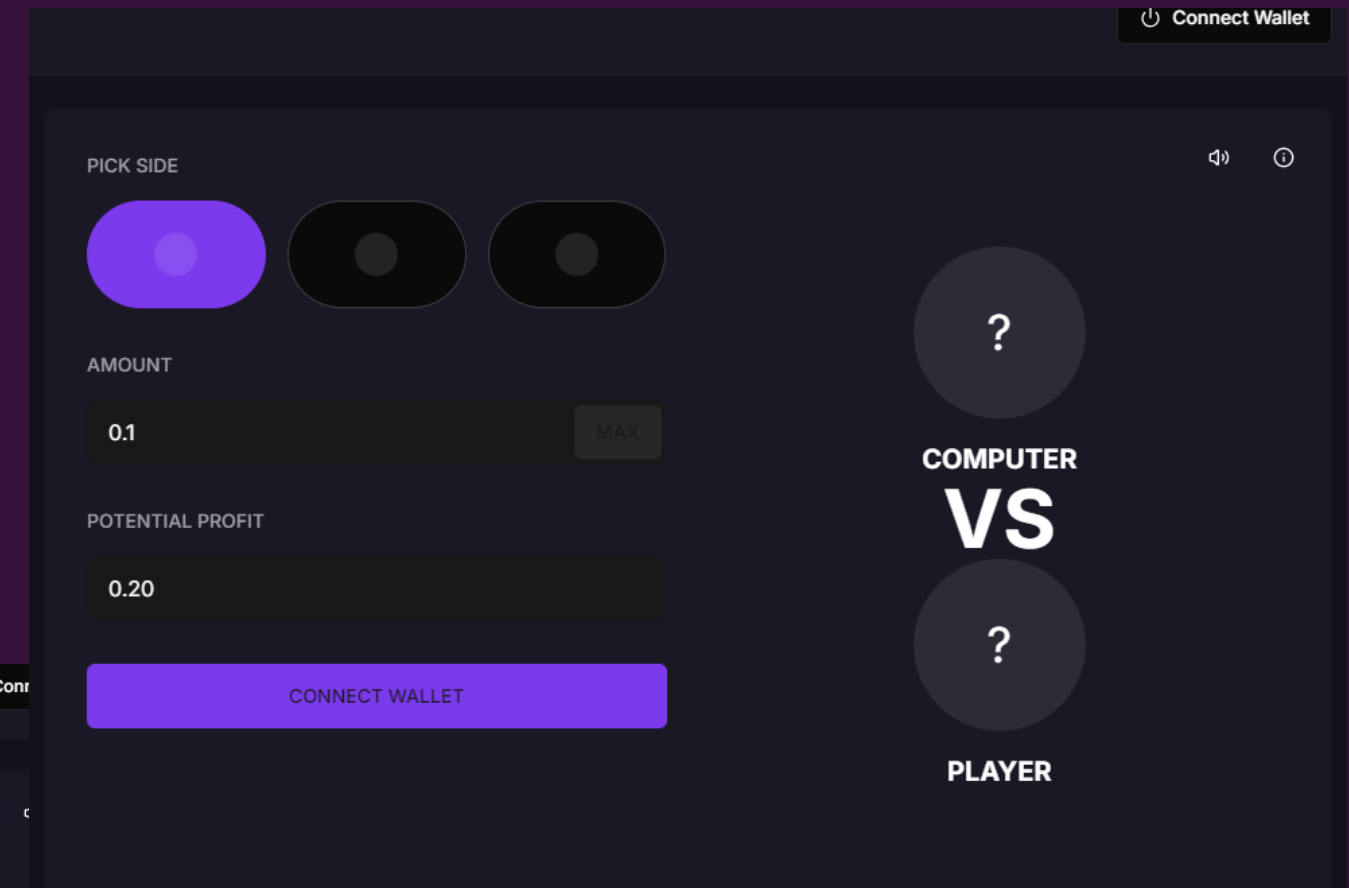

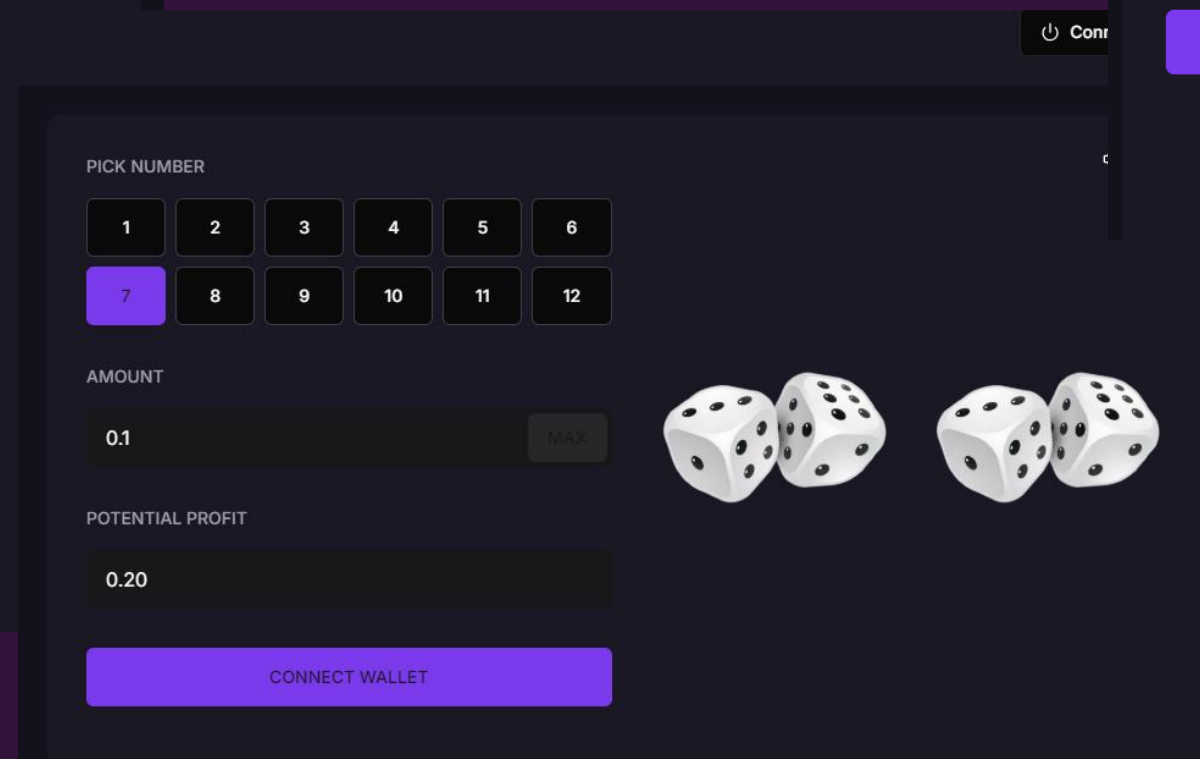

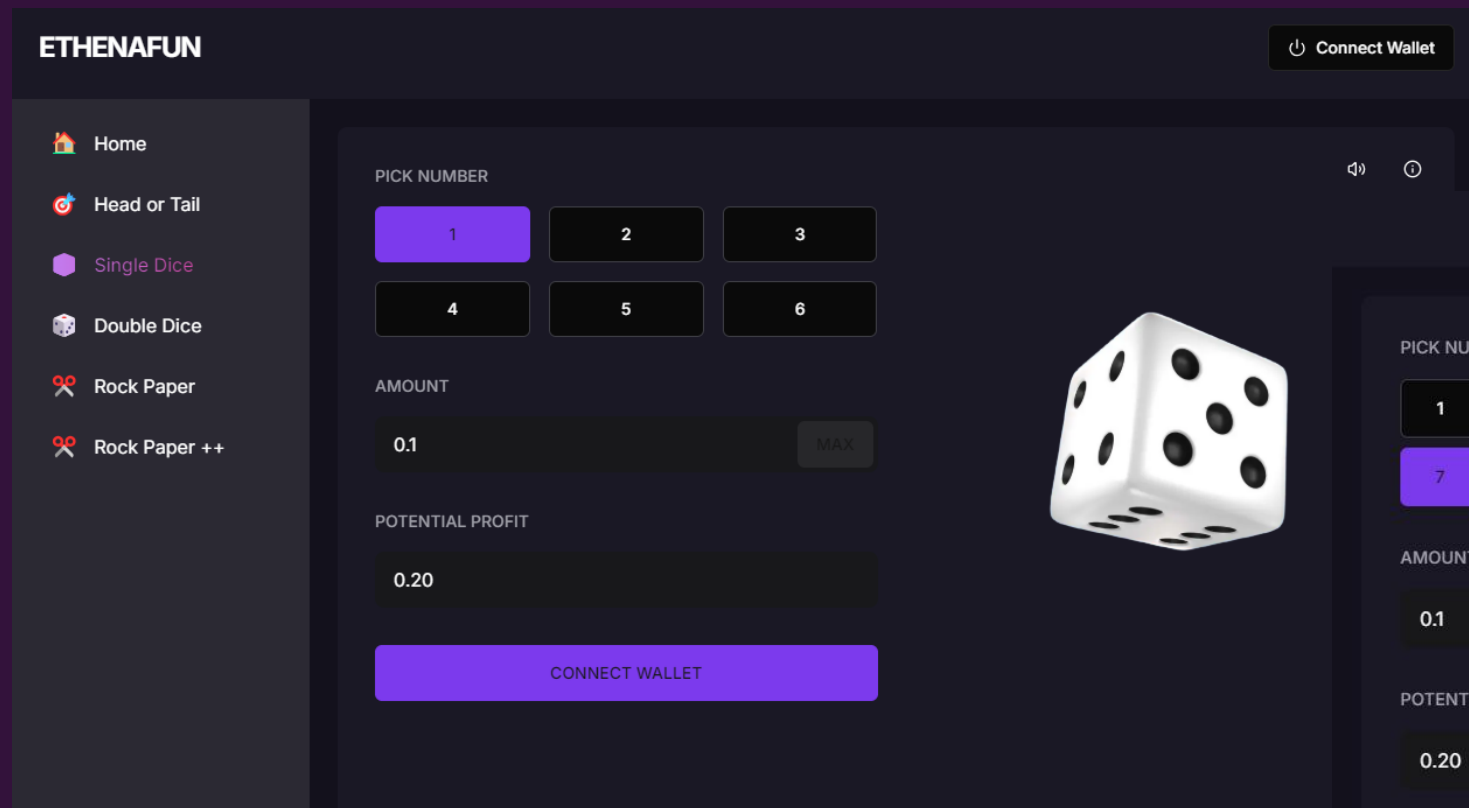

Expanding game
offerings

Future Roadmap

09

Working on these other web3 games functionalities- Need web3 integration the ready to use

Tech Stack and Web3 Components

It consists of various components such as Smart Contracts, Frontend Interface, Backend Server, and Blockchain Integration, each playing a crucial role in maintaining the game's functionality and fairness.

2. Frontend:

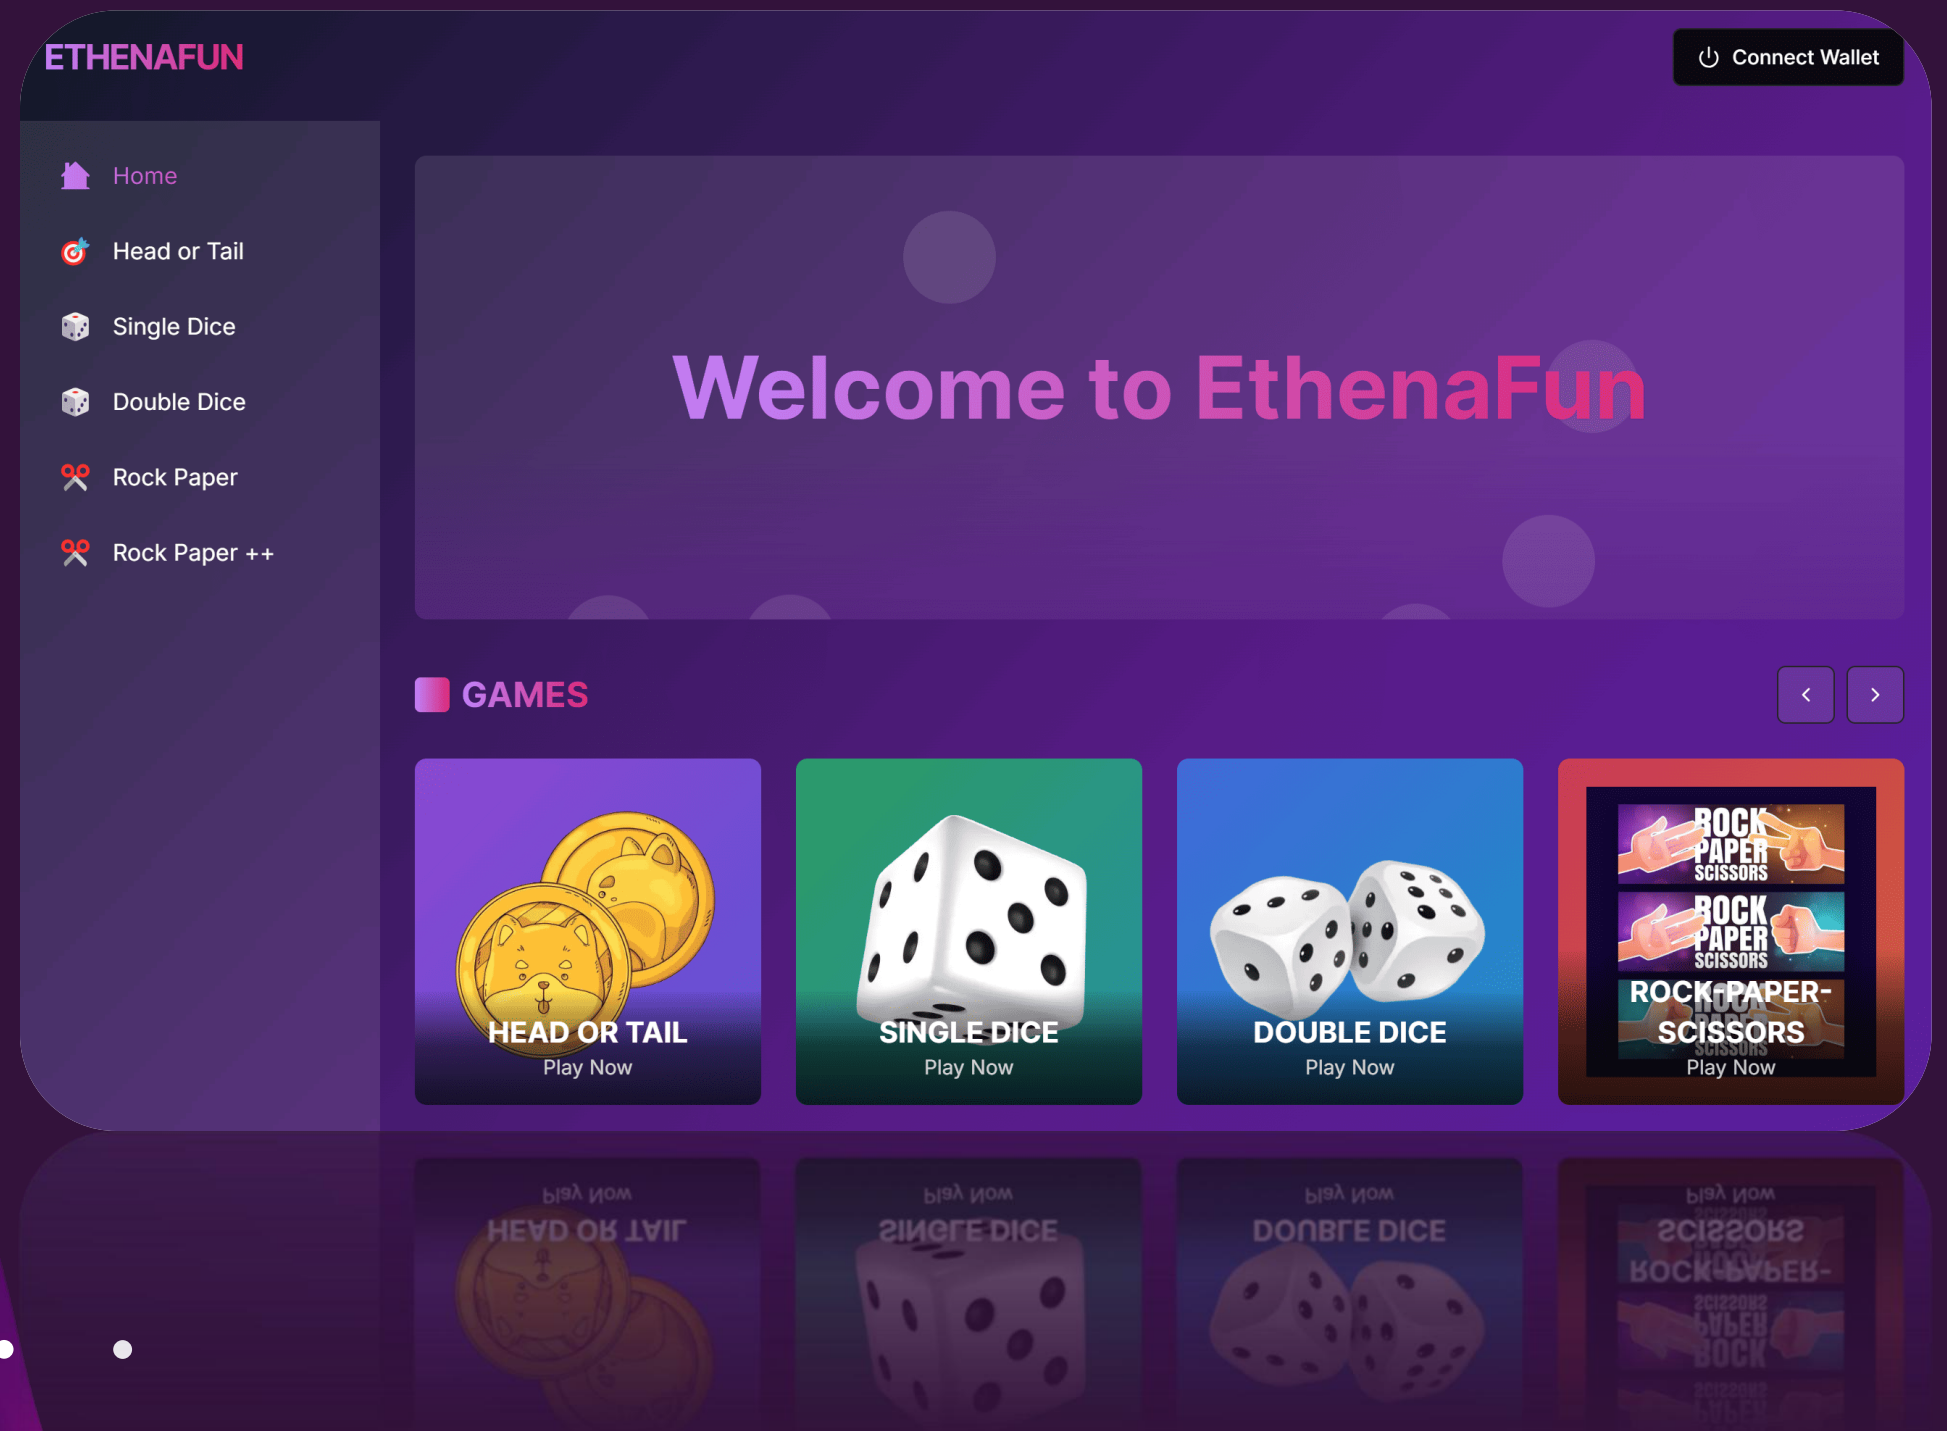

- Next.js modern interface
- Real-time game updates
- Wallet integration
- User statistics dashboard

3. Sponsor Technology Integration:

- Ethena's USDe stablecoin implementation
 - LayerZero cross-chain readiness
 - Goldsky subgraph for event tracking
 - Non-DeFi gaming application
- 

Who Can use

Anyone can play this game; they just need USDe Token on the Ethena Network. They can play this with a minimum of 0.1 USDe.
